ABOUT US

Franklins is a New Zealand owned and operated family company, established in 1954 by the late Peter Smith. It is now run by his son, Stephen Smith, with the help of his sons, James and Connor Smith.

Franklins specialise in everything plumbing, servicing plumbers and builders, architects and designers, developers and end users.

In 1995, Franklins pathed change in the New Zealand plumbing industry by working with major plumbing and bathroomware brands direct; designed and manufactured in Europe.

Franklins believe that quality is everything, without quality, everything means nothing.

James, Peter (late), Connor and Stephen Smith.

14 EXCLUSIVE EUROPEAN BRANDS

CORE VALUES

CUSTOMER ORIENTATED

It is only because of our customers that our company exists.

YES CULTURE

Never say no, there will always be a solution.

TAKING RESPONSIBILITY

Be proactive, not reactive. find the solution.

OPEN COMMUNICATION

Effective communication between staff and customers at all times.

TEAMWORK, RELIABILITY AND RESPECT

Not finance, not strategy, not technology, it is teamwork that remains the ultimate competitive advantage. Both because it is so powerful and so rare.

MUTUAL TRUST / HONESTY

Working FOR the company, not IN the company.

UNCOMPROMISING STANDARDS

We wake up every morning asking ourselves how we can strive to do better. Continuously improving and exceeding ourselves each and every day.

EDUCATION

Educate and develop our customers and employees so they can go further, faster.

FAMILY BUSINESS

We don't merely think from one quarter to the next but from generation to generation.

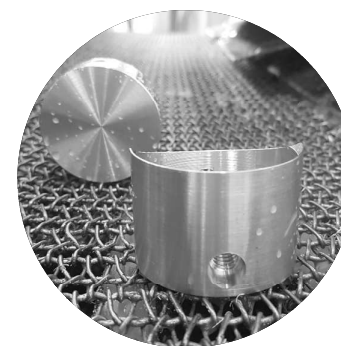

SOLUTIONS BASED COMPANY

Integrating the three pillars of service excellence, quality and innovation.

HEALTH AND WELLBEING

Creating a workplace focused on the health, safety and wellbeing of the employees, the environment, our customers and the communities where we do business.

SLOGAN

Delivering innovative solutions since 1954.

MISSION STATEMENT

Working within the industry for the industry; to deliver service excellence, quality and Innovation.

VISION STATEMENT

To revolutionise the industry by inspiring our partners that quality is everything and without quality, everything means nothing.

OUR STORY

In 2018, Franklins decided to change its focus: to supplying the public through the trade. This ensures our products are installed by certified plumbers and builders raising the standard of New Zealand homes and benefiting the end user. With our architecturally designed and well positioned Design Studios in St Johns, Hamilton and Wellington the public have on show Europe's finest collection of bathroomware.

Our Design consultants are able to assist with your bathroom design decisions in a professional manner. They are working every day with a diverse spectrum of clients from Architects and Designers, Plumbers and Builders to Developers and Consultants achieving beautiful outcomes!

Every year members of the Franklins Executive visit the major Bathroom fairs in Germany and Italy to keep ahead of the latest trends that Europe has to offer. By direct importing these products they can be installed in your own bathroom with expertise and in the most cost effective way. Ask your installers, are they using Franklins German Copper to match? Refer to Page 15 for how this installation can look (Elliot Johnston Builders projects).

Franklins footprint is growing and will be in your neighbourhood soon bringing a new standard for plumbing and bathroom suppliers to your doorstep!

We have a wide range of platforms you can visit Franklins on. Come into one of our Design Studios, or have a 3D tour on google maps. Browse our bathroomware on our website and get some inspiration from one of our many social media channels; Facebook, Instagram, LinkedIn, Archipro and Pinterest.

OUR TEAM

The people behind the company are as important as the company itself. Franklins is led by Stephen Smith and his supporting executive committee. This executive is the driving force behind the Franklins operation supported by a network of branch managers, sales and customer service representatives, architectural executives, design consultants, warehouse managers, drivers, trade counters sales, finance administrators, marketing and graphic designers. We are forever grateful to each and everyone of our team for the work they put into the success of Franklins.

EXECUTIVE COMMITTEE

Stephen Smith
Chief Executive Officer

James Smith
National Contracts Manager

Connor Smith
Head Office General Manager

Bruce Walkley
Commercial Manager

Dan Stewart
National Operations Manager

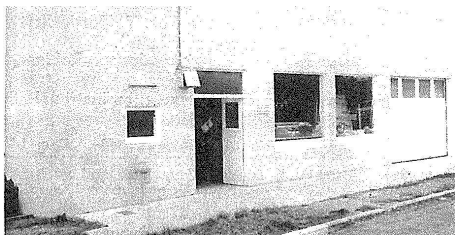

ARCHITECTURAL EXECUTIVES

Franklins Specification was set up to assist Architects and Designers in selecting the best products for their projects. They offer a strong understanding of design and budget requirements and provide a full take off service for your next project.

Charlotte Meyer
Bay of Plenty / Waikato Region

OUR HISTORY

1954
Franklin Plumbers and Builders Supplies Ltd began as a very small Wholesaler in 1954 on Franklin Road, Pukekohe by its Founder Peter Smith. The building had a small road frontage and storage area. It supplied predominately Plumbers and Builders for their general supplies and serviced the local Franklin District. At this time Franklin's supplied both door hardware, paint and other common hardware along with it's plumbing supplies.

1968
Franklin Plumbers and Builders Supplies Ltd relocated 50 metres up the road from its original location into a new purpose made building including a retail showroom. This was unusual for this period of time. In these early days there were only 6 staff. It was in this period that Bathroomware Retailing was in its infancy. Franklin's was one of a few companies that had a Retail Showroom. Colour options began entering the marketplace during this time and during the 1970's.

1985
Franklin Plumbers and Builders Supplies Ltd created its first official logo and refurbished the existing shop frontage. It also purchased a number of adjoining lots including an old Villa built around the 1900's and a Panel Beating Shop. These buildings became additional warehousing.

1997
Franklins redeveloped the building and site into a single Warehouse and Office/Administration hub to complement their new push into an International Procurement Supply Model. In 1995 Franklin's broke the traditional way of procurement by working with high end brands from Europe rather than local manufacturers or importers. Franklin's built its supply chain to reach over 20 International Supply Partners and quickly outgrew the new warehouse. Franklins expanded to a total of 6 warehouses around Pukekohe.

2014
Franklins re-designed its Head Office/Warehouse on Stadium Drive Pukekohe. The building was modernised. It was during the 2000's that Franklin's released its new Logo and Slogan in Black and White.

2020
Franklins decided in January 2020 that it could no longer function logistically working from 6 warehouse locations within Pukekohe. It announced to the Franklin's group of companies of a major change. Franklin's signed a long term lease with Goodman's to move to a new Logistics Centre based in Waiouru Point within the Goodman Industrial Estate, off Highbrook Drive, East Tamaki. This new location consists of 2 buildings with a total warehouse space of 3800 sq. m and accompanying offices of 600 sq. m.

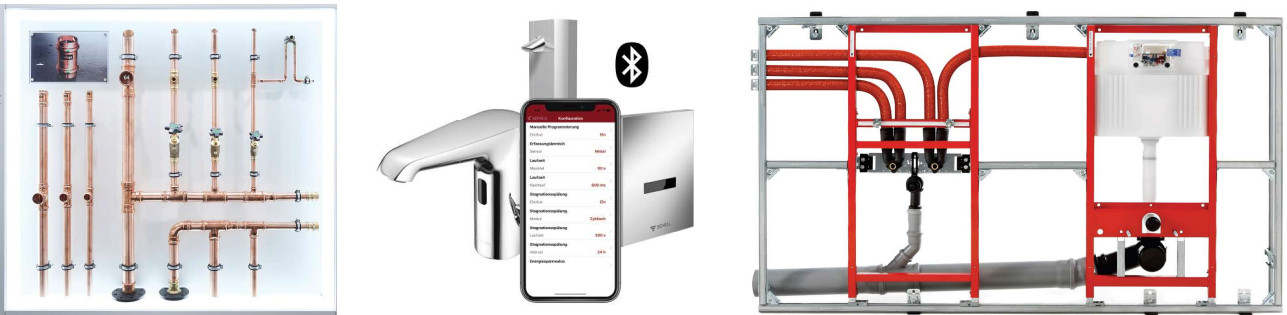

OUR FUTURE

In Franklins' new Head Office and Distribution Centre we will have a brand new German style training room. This hands-on facility will be available for all plumbers. The goal is to give them the training required to use Franklin's products confidently for the future focusing on drinking water quality and hygiene. With this education they will understand the importance of recommending and installing only high quality plumbing and bathroomware in the construction industry.

Our new training rooms are inspired by our German partners' training rooms.

The training programs will be customised based on the attendees' preferences and experience levels. These trainings will cover a wide range of topics including: press and infrared technology, in-wall cisterns, Bluetooth controlled products and all the latest innovations directly from Europe.

We will also hold customised trainings for apprentice plumbers. By hosting these trainings, Franklins hope to educate young plumbers in the importance of using only high quality products as they move through their apprenticeship to be fully qualified plumbers.

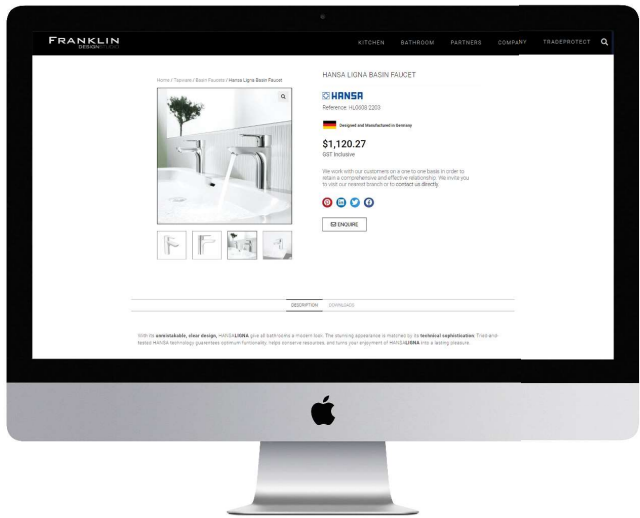

Plumbing companies are invited to use our facilities to hold their own trainings and tool box sessions in our meeting rooms. We look forward to welcoming you to this facility.

Educating the Trade, Educating the Industry.

HOW TO USE THIS CATALOGUE

Throughout our catalogue you will find these symbols and phrases. We have put these in to help you find new products, products with special features and products at the price point that suits you.

NEW	New products to Franklins	H	Home Series
SSC	Schell Single Control - refer to Page 450	L	Living Series
R	Rimeless or RIMEX Toilet Pan - refer to Page 371	E	Edition Series
B	Blue Box Technology - refer to Page 14		
1TH	One Tap Hole		
NTH	No Tap Hole		

The Franklins website has been designed with you in mind as a user-friendly way to access key information. You can view our wide range of products and download images and technical specification sheets.

www.franklins.co.nz

H **HOME SERIES**
Products in the Home Series are visually appealing and of high quality whilst offering a more affordable price tag. These products will not disappoint either aesthetically or functionally.

Price Point: High-Range to Exclusive

DESIGNED AND ENGINEERED IN **GERMANY**
MANUFACTURED IN **EUROPE**

HANSA supplies the best quality in the market: A commitment that they have set themselves and is the standard on which customers base their evaluation. They meet this standard with both passion and purpose: providing products whose design, material, finish and technology continue to set new benchmarks.

CARTRIDGE

Hansa have an open flow cartridge where flow rates are controlled by an elliptical o-ring and honey comb aerator which maintains a 6 litre flow rate if pressure is increased higher.

CHROMING

Hansa has perfected the balance between Nickel (12 Micron) and Chromium (0.3 Micron) to ensure its premium, non tarnishing finish.

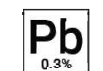

NICKEL FREE

For the Chromium to adhere to brass nickel must be applied first. It is during this process that Hansa block access to all waterways of the body ensuring the faucet apertures are Nickel free.

COMFORT AND SAFETY

Hansa Cartridges allow 120° of comfort zone. This provides the user greater anti scald protection with young children who tend not to be so careful when moving from cold to hot.

TYPE OF BRASS

Hansa use MS63DR Brass. This is premium brass due to low lead content. 63% Copper / 36% Zinc – <0.8% Lead in Basin faucets and <0.3% Lead in Kitchen Faucets.

HIGH TECH FUNCTIONAL CORE

Hansa are using plastics with DVGW Certifications, conforming to KTW Standards and tested in accordance with W270, maintaining drinking water quality as it flows through the faucet.

Voted trade's No.1 Brand in Germany for the last 42 years.

HANSA BLUEBOX

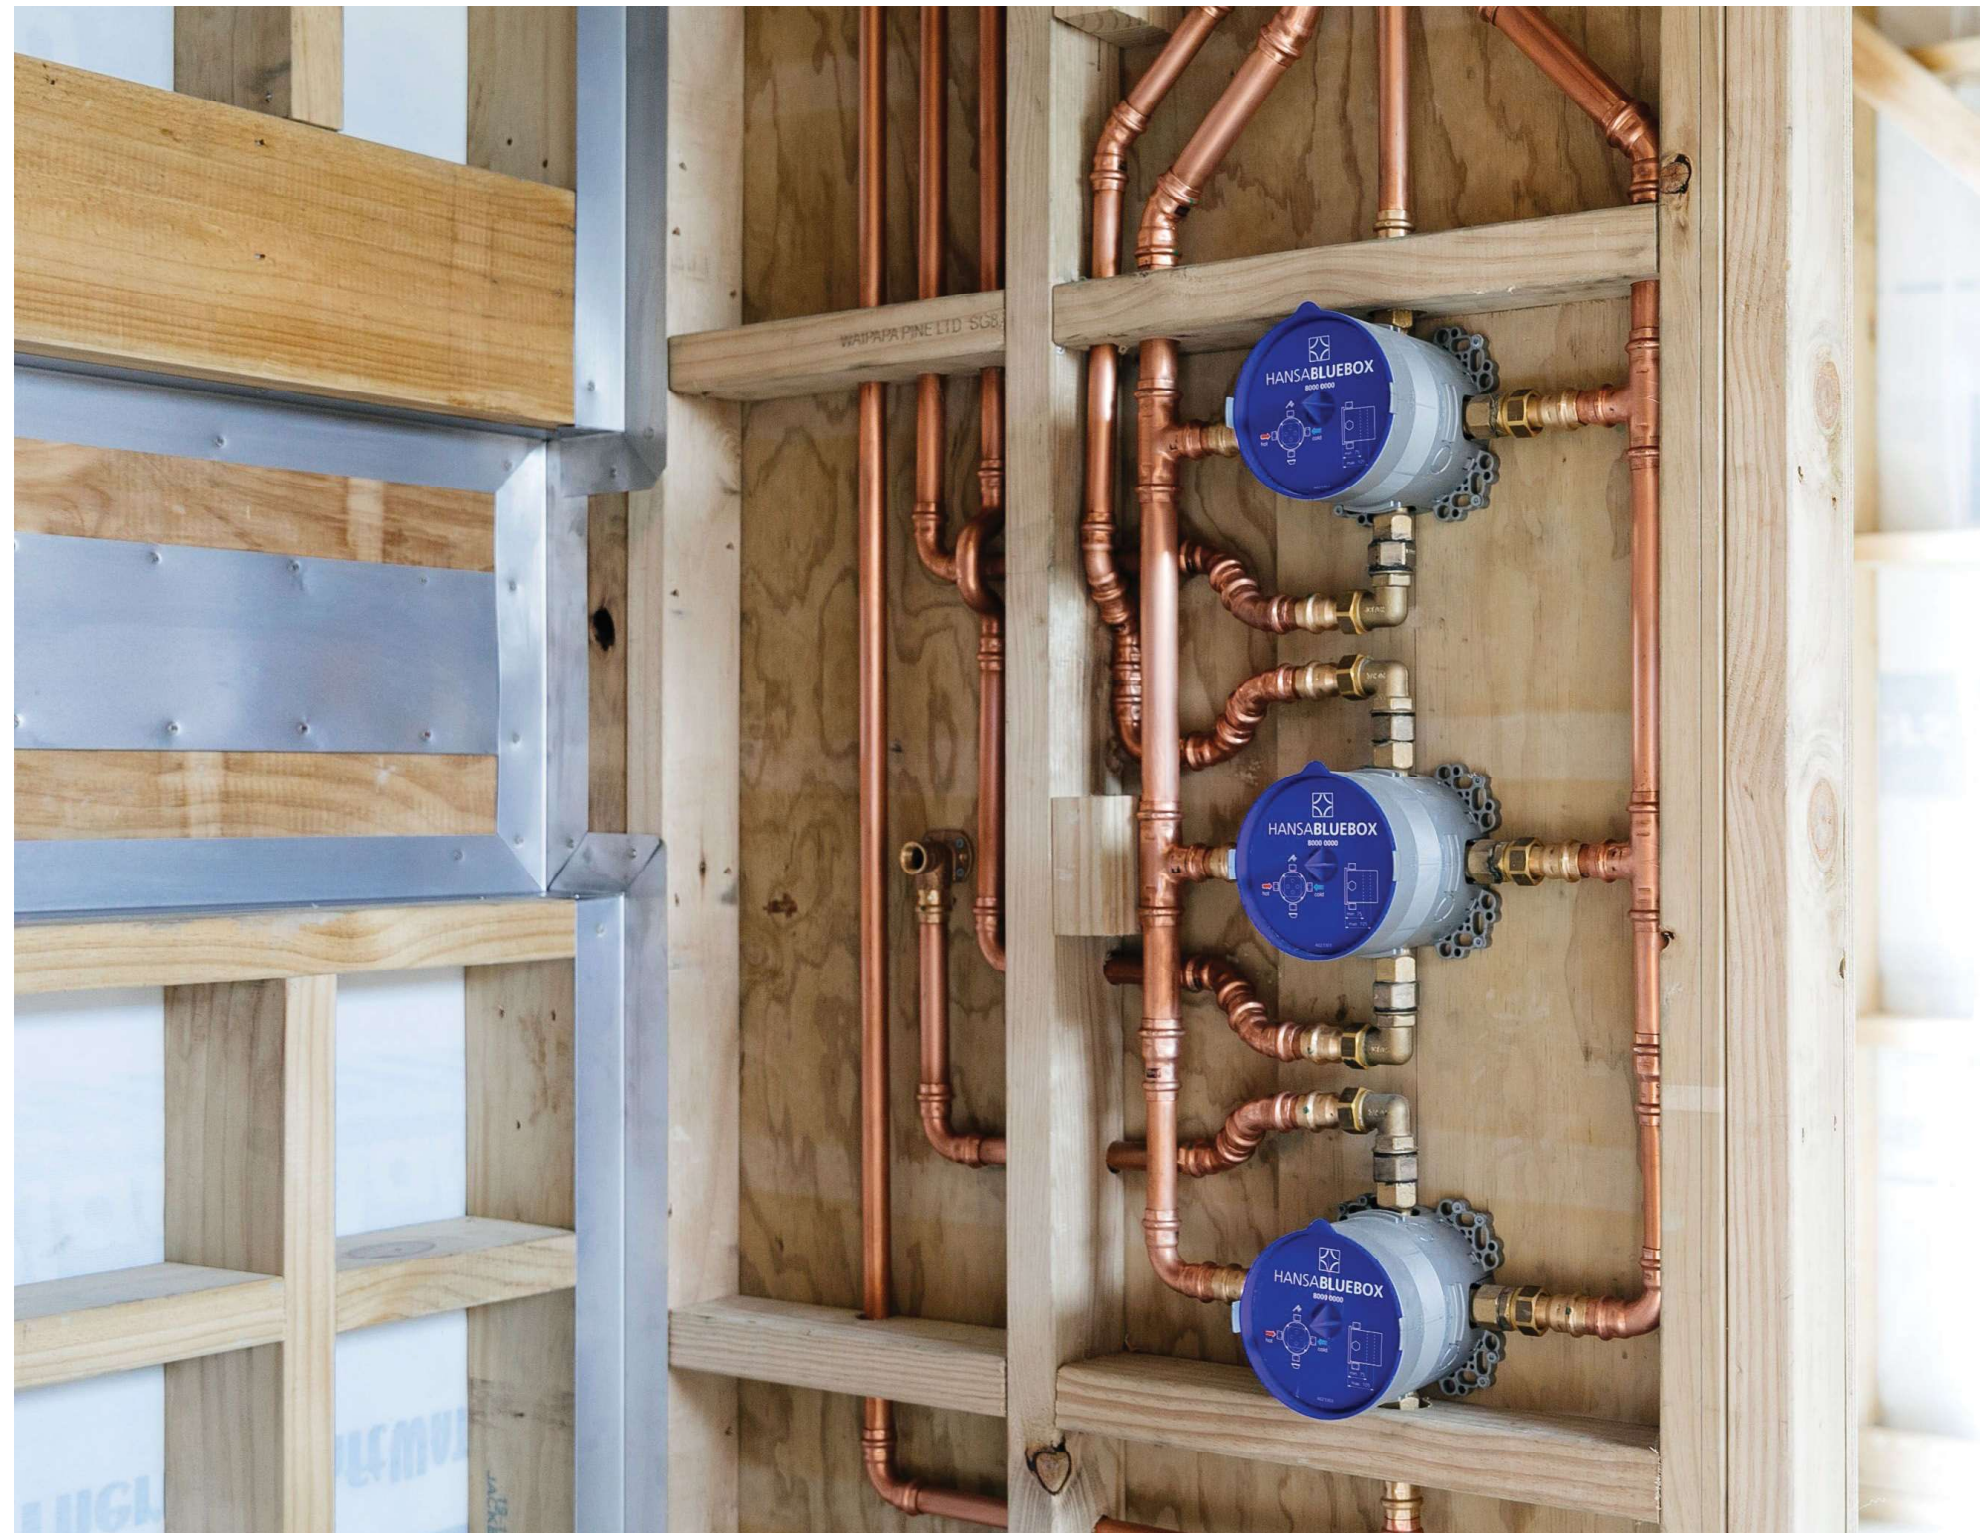

The new concealed system from HANSA has set a benchmark in the trade and is based on many years of experience and intensive development work. HANSABUEBOX includes unbeatable design features which ensure optimum performance for the end user with regard to excellent handling and high-quality design. The ceramic "BLUESWITCH" diverter works independently from hydraulic pressure and is easy to operate.

In addition to this, HANSABUEBOX technology allows for simple, safe and precise installation. With just one system, the HANSABUEBOX is optimised for installation and means that installers can cope with a range of installation situations and consumer needs. To prevent installation issues, HANSABUEBOX enables subsequent adjustability of the functional unit (+ / -3.5°) to correct the alignment to the joint pattern if necessary. As well as this, the concealed system involves a hot/cold reversal adapter which facilitates easy troubleshooting following installation. The HANSABUEBOX system is also incredibly flexible and is ideally suited to all installation systems.

B

Products in this catalogue that include HANSABUEBOX technology are indicated by this symbol.

Install by E J Building - www.ejbuilding.co.nz

HANSAPOLO

The characteristic, dynamic and contemporary design of HANSAPOLO can be integrated successfully in a broad range of bathroom designs. The technology and the functionality deliver the goods even after intensive use over many years.

HANSA ALESSI SENSE

ALESSI Sense by HANSA allows for intuitive and controlled use of water. There is a semi-transparent dish at the top of the fitting that you operate like a button. The flow of water is activated by pressing it briefly or for longer. An LED bar that functions like a timer 'runs out' accordingly. The flow of water can be stopped at any time by pressing the dish again. This gives you a sense of how long the water actually flows and you learn how to use it more consciously. Designed by **Rodrigo Torres**.

HANSASPOUTS

For those who appreciate sustainability, HANSA bath spouts enable better living without sacrificing performance or design - responsibly made from the finest, most durable material. There is only one way in for water – the fitting – and that puts it at the centre of attention in our daily rituals. HANSA presents individuality and variety with its high-quality bath spouts for the bathroom.

HANSABASICJET

The straightforward, geometrically clear design with its rounded edges and transitions puts the HANSABASICJET series of showers at the forefront of contemporary styles, and ensures that they are a perfect match for all modern fitting ranges. The 3-spray model is especially beneficial and versatile. The three spray types – ‘relaxing’, ‘refreshing’ and ‘EcoFlow’ – allow for both relaxation as well as invigoration under the shower.

HANSAVIVA

The HANSAVIVA range was designed with comfort in mind - which makes having a shower an unforgettable experience. In addition to the typical HANSA quality, the cutting-edge design and the extensive functions, the series is very impressive due to its excellent price/performance ratio. The HANSAVIVA shower systems stand out with their straightforward and functional design.

HANSAACTIVEJET

The showers in the HANSAACTIVEJET series follow the current trend towards health and well-being. They fit into any bathroom style with the two options of shape and colour. With the 3-spray variants, the spray can be set individually at the touch of a button - a different experience with each spray type. The 'INTENSE' spray is perfect for general use. The 'SENSITIVE' spray is for sheer enjoyment and relaxation. The 'PULSE' spray is ideal for releasing built-up tension.

HANSAEMOTION WELLFIT

Recuperation, relaxation, regeneration – exactly what the HANSAEMOTION promotes. It makes the healing powers of water experiential – directly in contact with one's own body. At the touch of the button, the beneficial regeneration programmes help body and spirit to revive quickly after a period of physical strain.

BATH AND SHOWER MIXER (BLACK)

HE5864 2172 84

Developed together with medical specialists, physiotherapists and other health experts, this shower system makes for an entirely new wellness experience in your own bathroom. The core component is the HANSAEMOTION thermostat with optional Wellfit function. One of three well-being programmes can be selected by pressing the Wellfit button in the centre of the thermostat. Each programme has a specific effect on the body that matches what we experience day by day.

The RELAX function has a soothing effect with its long hot-water phases and gentle temperature transitions. To get the circulation going and recharge the body with energy, the RELOAD function with its balance of hot and cold stimuli is ideal. With the RECOVER function, intensive cold-water cycles produce a cooling-down effect that can help to relax the muscles, prevent stiffness and in the long term it even strengthens the cardiovascular system.

HANSAVARIO

More water, more flexibility. Whether a shower series with central thermostat or a shower oasis with a large number of side showers – you can implement applications that require especially high flow rates using HANSA VARIO concealed thermostats and stopcocks. The thermostatic mixing valves are designed to deliver mixed hot and cold water at a constant temperature. The valve compensates for any temperature variations in the water supply.

ARMANDO

VICARIO

DESIGNED AND MANUFACTURED IN **ITALY**

Armando Vicario, situated in Northern Italy, close to the magnificent Lake Orta, is a family owned and run company. It was founded in 1974 to produce outstanding kitchen tapware, but over time, its production was extended to a full bathroom programme. A new path was created, characterised by outstanding results and entrepreneurial challenges aimed at making the products more innovative and exclusive.

BETTE

DESIGNED AND MANUFACTURED IN **GERMANY**

Bette have been producing premium architectural bathroom components from steel-titanium alloy enameled with purely natural materials since 1952. Their thermoforming process allows them to create flowing shapes with extraordinary craftsmanship and precision. Bette products are one-of-a-kind, with a range of colours and dimensions to create an inspiring space in every bathroom design.

Glazed Titanium Steel by Bette is harder than marble, plastic or steel alone. Bette's process permanently binds three ultra-thin layers of their special enameling formula to the titanium steel carcass in two firing steps at 850°C. The resulting products unite the freedom of form of steel with the unique properties of glass.

IMPACT RESISTANT

The secret behind Bette Glaze is the strength of its ultra-thin layer. Like glass fibre, it remains flexible and resilient to the usual forces that occur in the bathroom.

SURFACE

Bette Glaze is harder than marble, plastic or steel, but non-porous and resistant to abrasion and UV rays. A premium quality guaranteed for 30 years.

HEAT CONDUCTIVE

Titanium-steel alloy and enamel is a perfect heat conductor. It quickly absorbs the warmth of the bath water, to ensure a highly beneficial bath.

SCRATCH RESISTANT

The surface of Bette Glaze is harder than marble, plastic or steel. When used as intended it is almost impossible to damage with any thing normally found in a bathroom.

CHEMICAL RESISTANT

Bette Glaze is particularly robust. It is resistant to cosmetics and bath additives. Even nail polish will not mark it.

HYGIENIC

Dirt and bacteria are unable to adhere to the glass-hard, non-porous surface of Bette Glaze. This makes it highly superior to softer materials or tiled areas.

BETTECRAFT

The combination of clear design language and filigree materiality gives the BetteCraft washbasin bowl an elegant matter of course. Due to the thin, tapering side walls, the generous shape appears organic and delicate. Design: **Tesseraux + Partner**

BETTELUX OVAL COUTURE

The first fabric-coated baths bring home comfort into the bathroom and bathroom comfort into your home. The body of these baths is manufactured conventionally from enamelled titanium steel, yet the bath panel is made from woven waterproof and climate-resistant fabric. Design: **Tesseraux + Partner**

 DESIGNED AND MANUFACTURED IN GERMANY

BETTELUX SHAPE

The design of the BetteLux Shape is flowing and natural from an organic basic shape and extremely filigree outer edges. Powder-coated steel frames bring out all the beauty of the bathtub and keep it weightless in the room. The specially developed invisible overflow BetteSensory underlines the idea of perfect reduction.

BETTELOFT ORNAMENT

The great versatility of glazed titanium steel is evident in the free-standing bathtub BetteLoft Ornament. Its expressive outer shape quotes the straight lines of the interior and continues this in a geometric pattern. Filigree side edges form the spacious inner body and ensure particularly high lying comfort. Design: **Tesseraux + Partner**

BETTELOFT

Four conical surfaces form the basic shape of the BetteLoft built-in bath. Filigree side edges form their generous inner body and ensure particularly high lying comfort. The eight millimeter thin, folded tub rim enables flush installation. Highest technical perfection and extremely small corner radii give the minimalist design its expressive character.

DESIGNED AND HANDCRAFTED IN ITALY

Valdama is a company located in Civita Castellana. It was created to respond to the needs of a big market offering only "Made in Italy" products under the highest standards of design, quality and innovation. Valdama is founded by Daniele Vitali and works with his sisters Valentina and Marta. Thus the Val-Da-Ma name.

Valdama's traditional, non-mechanized 10 day production makes them unique in their sector. Each piece is followed throughout its creation phase, from the modelling process to the choosing of the item, under the supervision of qualified and certified individuals.

Valdama's difference and strength is the ability to tailor the forms of the products to create special and unique pieces to satisfy customer's needs.

marmorin

DESIGNED AND MANUFACTURED IN **POLAND**

Marmorin, like Franklins, is a 3-Generation family owned company in Poland with over 30 years of experience. Marmorin's philosophy is centred around quality excellence, attention to detail and the importance of design. Their beautiful products are a reflection of the power of the human mind and modern technology. Marmorin's unique products are made possible by the casting material and production process that the company has developed.

MINERALICAST® was developed over 35 years ago and is constantly improved over time. It is one of the most reliable and unique cast materials available. The main component is purified Dolomitic Marble, a metamorphic rock formed by natural transformation and estimated to be over 500 million years old! The powdered Dolomitic Marble is mixed with a dedicated resin creating a strong casting filler. The chemical and physical properties of MINERALICAST® allow Marmorin to manufacture high quality products with almost unlimited shapes and efficient technical and functional features.

 500 MILLION YEAR OLD DOLOMITIC MARBLE	 HIGH CONTENT OF NATURAL MINERAL	 GLOSSY FINISH	 FULLY DEAERATED	 SCRATCH RESISTANT
 VOID-FREE AND NON POROUS	 STAIN RESISTANT	 EASY TO CLEAN	 THERMAL-SHOCK RESISTANT	 SURFACE ABRASION RESISTANT
 REPAIRABLE & RENEWABLE SURFACE	 HYGIENIC	 IMPACT RESISTANT	 WARM TO TOUCH	 UV RESISTANT

MARMORIN ELLIPSE

Ellipse is a bath characterised by its contemporary elegance and understated purity. Sleek lines and alluring curves create the perfect balance between beauty, comfort and luxury. With its simple, symmetrical form, Marmorin Ellipse brings harmony and balance to the bathroom environment.

TECE

close to you

DESIGNED AND MANUFACTURED IN **GERMANY**

TECE is a family owned, German company with a global reputation for innovation. They have removed the idea that the toilet is just an unfortunate but necessary addition to the home. Through excellence in design and attention to convenience and functionality, TECE has redefined the way toilet systems work and turned the mundane into something attractive and ingenious.

HYGIENIC

QUALITY YOU
CAN FEEL

FREEDOM IN
DESIGN

AESTHETIC
IS THE NEW
STANDARD

A REPUTATION
FOR INNOVATION

DESIGN AND
FUNCTIONALITY

TECEONE

The TECEone shower toilet includes water flow and temperature regulators mounted on either side of the ceramic bowl. This allows for intuitive operation so users can tailor the properties of the shower toilet to suit their own preferences. TECEone has also been designed to meet the demands of planners, architects, fitters and operators. Its compact design ensures efficient, secure and simple installation.

DESIGNED AND MANUFACTURED IN GERMANY

Note: No power source required.

9.700.600

TECELUX

Press and flush was yesterday. The toilet of today can do so much more: rinse and blow dry, purify the air and flush automatically. But the aesthetics are often sacrificed for this additional hygiene and comfort. TECE has now created a form that unites all functions. The technology disappears into the wall and all that remains visible is a flat facing made of white safety glass.

DESIGNED AND MANUFACTURED IN GERMANY

Min installation depth: 18mm min / 50mm max between cistern and surrounding finished wall lining.

NEW

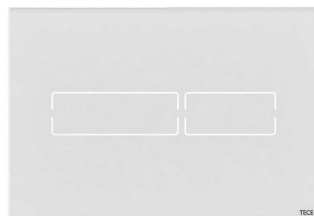

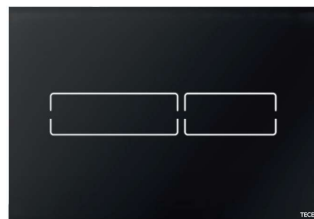

INFRARED TERMINAL FOR
STANDARD PAN WHITE

9.650.002 KIT WHITE

Disclaimer: Must allow 160mm in the wall. Requires power source.

TECELUXMINI

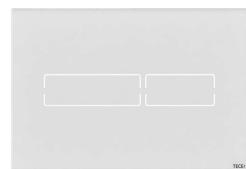

The TECElux mini is an electronic glass flush plate for the TECE cistern. The flush actuation is touch-free or by means of a light tap on the button area. The approach sensor recognises when a person approaches the toilet, and activates the illumination of the button area, additionally serving as an orientation help in the dark.

DESIGNED AND MANUFACTURED IN GERMANY

Min installation depth for Surface Mount: 10mm between cistern and surrounding finished wall lining.

Min installation depth for Flush Mount: 25mm between cistern and surrounding finished wall lining.

Disclaimer: Cannot use slimline cistern, must allow 160mm in the wall.

Note: Frames required for flush mounting and tiled walls only. Requires power source.

TECESQUARE

The TECESquare metal emphasises the effect of the pure stainless steel and perfect integration in modern bathroom architecture with its extra-flat design. Three fine joints characterise both buttons for the flush – a wide button for the full flush and a small one for the partial flush.

DESIGNED AND MANUFACTURED IN **GERMANY**

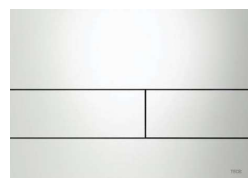

Min installation depth: 25mm between cistern and surrounding finished wall lining.

TECEPLANUS

The TECEplanus flush plate made of stainless steel is robust and especially vandal-proof. A concealed screw further protects it against theft. So they are particularly suitable for public sanitary areas, restaurants or hotels. Their especially compact dimensions and elegant design harmonise with any mood.

DESIGNED AND MANUFACTURED IN GERMANY

Min installation depth: 10mm between cistern and finished wall lining.

TECESOLID

TECESolid targets the market segment of public and semi-public toilets – areas where aesthetics are not normally the top priority. Here the plate is visually and functionally something quite nice. The design is reduced-puristic and yet easy to read: A large button, a small button – dual flush technology, of course suitable for all TECE universal cisterns.

DESIGNED AND MANUFACTURED IN **GERMANY**

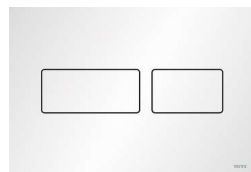

Min installation depth for Surface Mount without spacing frame: 18mm between cistern and surrounding finished wall lining.

TECENOW

With a flat structure and minimalist design, the new flush plate proves that good design doesn't have to be expensive. TECENOW offers the tried-and-trusted dual-flush technology with small and large volume flushing.

DESIGNED AND MANUFACTURED IN GERMANY

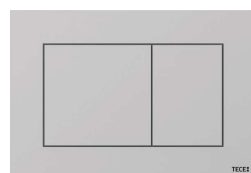

Min installation depth: 15mm between cistern and surrounding finished wall lining.

TECELOOP

TECEloop flush plates with dual-flush system are reduced to a minimum in their formal appearance. The different material and colour combinations of frames, buttons and the unique option of flush-mounted installation lead to expanded design opportunities.

DESIGNED AND MANUFACTURED IN GERMANY

Min installation depth: 10mm between cistern and finished wall lining.

ACTUATOR CHROME

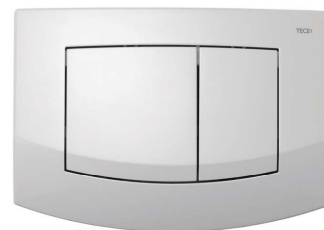

9.240.626

ACTUATOR WHITE

9.240.600

TECEAMBIA

The TECEambia flush plate with its dual-flush technology is the universal plastic standard. Its compact dimensions fit harmoniously in every bathroom environment. Double-sided rubber buffers reliably prevent rattling noises. Like all TECE flush plates, TECEambia can be combined with all TECE cisterns.

DESIGNED AND MANUFACTURED IN GERMANY

Min installation depth: 10mm between cistern and finished wall lining.

TECEINWALL CISTERNS

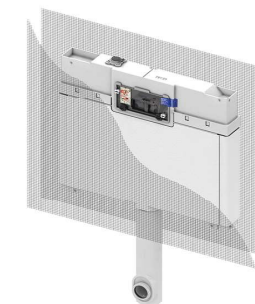

The TECEbox series is the TECE cistern for wet-walled pre-wall assembly. Integration of the universal cistern in brick-wall and dry-wall construction modules is just as important as the flush actuation function in front of the wall. Every TECE push plate therefore fits every TECE cistern

VitrA

DESIGNED AND MANUFACTURED IN **TURKEY**

VitrA's production of the finest European ceramic sanitary ware began back in 1958 and products are still made on-site in the factory in Turkey. Through an ongoing commitment to quality and environmental awareness, VitrA is the first and only brand in Europe to receive a Type-III Environmental Product Declaration for ceramic sanitary ware.

SECTOR

A REPUTATION
FOR INNOVATION

Design is at the core of the Vitra brand and as a company they strive to create innovative, purpose-led products that make life easier, better and more fulfilling for their users. Vitra's commitment to innovation, comfort, sustainability and aesthetics, is what allows them to transform the traditional concept of the bathroom.

VITRA HYGIENE

One of the many features that ensures lasting cleanliness for the Vitra toilet is Vitra Hygiene - an ion-rich surface technology that prevents germ multiplication by inhibiting growth by up to 99.9%.

The Vitra Hygiene glaze coats all external and internal surfaces prior to firing in a process that ensures lifetime Vitra Hygiene protection for Vitra ceramic sanitaryware.

Vitra Hygiene does not lose its protection feature even under intense usage conditions and ensures maximum hygiene for the end user.

VITRA RIM-EX

Another of Vitra's unique design innovations is the Rim-Ex system. The patented Vitra Rim-Ex system features a rimless bowl design that makes cleaning much more efficient and practical. This unique design ensures lasting hygiene by eliminating hidden and hard to clean surfaces where germs can gather and multiply.

The patented triple-nozzle Crastin diverter and the smooth curvature of the specially-designed bowl give a thorough and 25% more hygienic flush each time.

VITRAS50

S50 – Optimal solutions for the bathroom

With the S50 range size does not matter! You can find the highest quality, longest lasting products suitable for your bathroom

DESIGNED AND MANUFACTURED IN **GERMANY**

When it comes to fittings, SCHELL products have been the first choice for 80 years. Whether fittings for washbasins, showers, WCs or urinals. Whether regulating angle valves, or fittings for connecting heating, gas or household appliances such as a washing machine – SCHELL fittings belong in all places where robust, hygienic and resource-efficient solutions are needed. Especially in public, semi-public and commercial sanitary rooms, that experience high numbers of users.

'BLUE RESPONSIBILITY' INITIATIVE

RESPONSIBILITY FOR HYGIENE AND HEALTH

FAMILY OWNED BUSINESS

HIGH QUALITY PRODUCT

PIONEER IN TECHNICAL SOLUTIONS

OVER 80 YEARS OF EXPERIENCE

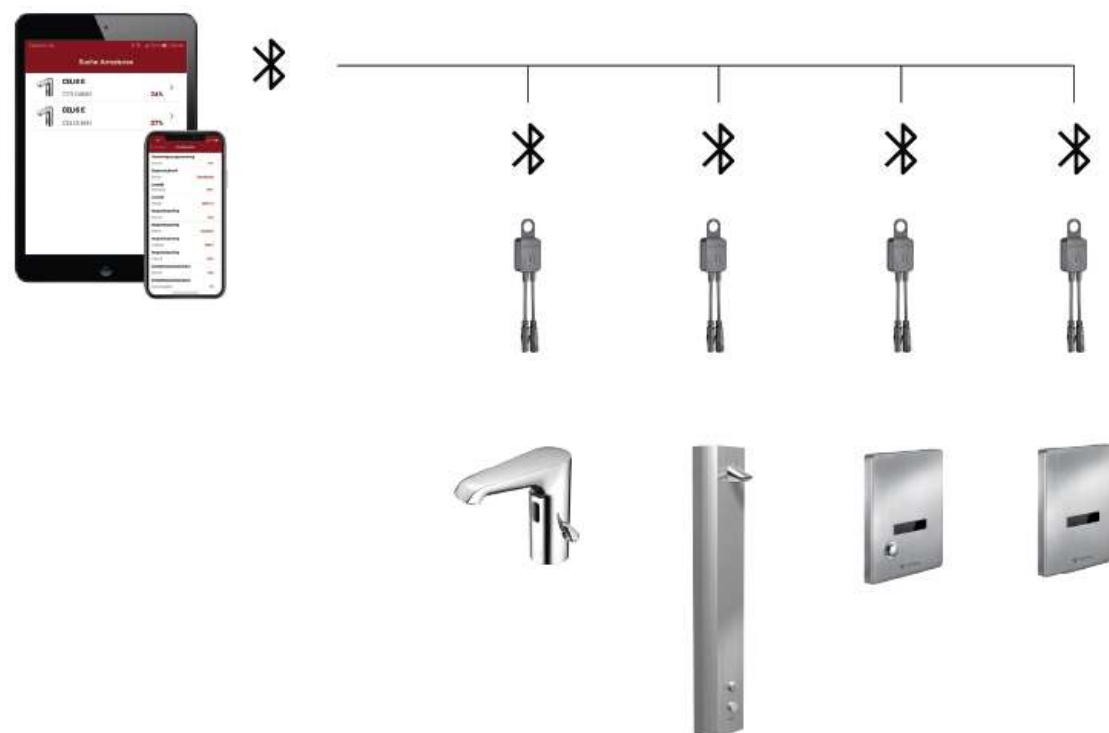

SSC - SCHELL SINGLE CONTROL

Schell's SSC technology provides advanced control technology and ensures convenient usage and the maintenance of water quality in public bathrooms. SSC allows for the practical and efficient setting of parameters on individual fittings using wireless Bluetooth technology. Parameters can be set on any SSC-compatible SCHELL fitting via the SSC Bluetooth module and the SCHELL Bluetooth app, using point-to-point communication over Bluetooth.

Setting parameters for individual settings manually is both time consuming and error-prone. SSC eliminates both of these issues and ensures an effective, economical and user-friendly system to optimise workload. Fittings on Schell washbasins, showers, WCs and urinals are all compatible with SSC programming. The SSC Bluetooth module can in each case either be used as a programming unit or left permanently installed on a fitting and connected to its power supply. This type of permanent installation offers additional functions, such as stagnation flushes using an integrated flushing calendar for specific times and days.

SCHELLXERIS E

The tap series is optically convincing due to its elegant and clear shape. The robust polished-metal design of the body of the fitting, the first-class finish, and high-quality technology meet the requirements for public areas. The highlight of the family is XERIS ET. It combines comfort and scalding protection through a thermostat, with maximum hygiene and economical water consumption through the contactless sensor control.

SCHELLCELIS E

The compact design of the CELIS E was made possible by positioning the battery compartment out of sight under the wash basin, which also makes it easy to service. The robust, high-quality, chrome-plated brass body offers sufficient protection against vandalism. The fitting is available in two designs for cold or pre-mixed water and for mixed (hot and cold) water. The infrared sensor system is located behind a slimline, rectangular sensor window, safe against vandalism.

Franz-Anselm Viegener founded this family-owned company in 1899, thereby laying the foundation stone for the success story behind today's Viega. With ten locations across the globe, over 4,000 employees and a wide range of products that covers the entire installation technology segment of the HVAC sector, Viega now ranks as the leader in this area.

Viega has one of the largest warehouses in Europe with 60,000 pallet locations that are fully automated. The warehouse picks 20,000 orders per day - which is more than 50 truck loads. This ensures an unparalleled level of service.

Viega's extensive range of premium products are the quality behind the world's finest buildings. A product segment often forgotten when discussing Viega is their complimentary catalogue, drainage. Often unnoticed, but no less important, Viega partners with Bette to deliver Drainage/Overflow/Bath Filler Combinations that far exceed industry norms.
