EASY-CLEAN GLASS MAINTENANCE

A hydrophobic compound solvent is utilized in the production of Easy-clean glass to generate a permanent bonding layer with the glass surface, resulting in a water and dirt resistant surface. To preserve the efficacy of Easy-clean glass, it is recommended to take note of the following guidelines:

- 1. Simply rinse the glass with clean water after daily use. If residual water droplets remain, use a towel or glass scraper to remove them to maintain the shine and cleanliness of the glass surface.
- 2. If the easy-to-clean function weakens due to extended use or inappropriate handling, apply glass cleaner or general cleaner, rinse with clean water, and the function will be restored.
- 3. Refrain from grinding or polishing the glass.
- 4. Avoid cleaning the glass with any acid, citrus, or alkali-containing cleaning products.
- 5. Avoid using hard or metal brushes to clean the glass.
