HANSA supplies the best quality in the market: A commitment that they have set themselves and is the standard on which customers base their evaluation. They meet this standard with both passion and purpose: providing products whose design, material, finish and technology continue to set new benchmarks.

DESIGNED AND ENGINEERED IN GERMANY

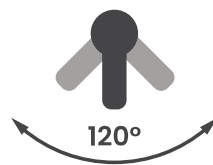

### NUMBER ONE

Voted trade's No. 1 Brand  
in Germany for the last  
42 years

### CARTRIDGE

Hansa tapware have an  
open flow cartridge where  
flow rates are controlled  
by an elliptical o-ring and  
honeycomb aerator which  
maintains a 3bar flow rate if  
pressure is increased higher.

### COMFORT & SAFETY

Hansa Cartridges allow  
120° of freedom. This  
provides the user greater  
anti scald protection with  
young children who tend  
not to be so careful when  
moving from cold to hot

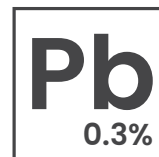

### CHROMING

Hansa has perfected the balance between Nickel (12 Micron) and Chromium (0.3 Micron) to ensure its premium, non tarnishing finish

### NICKEL FREE

For the Chromium to adhere to the brass nickel must be applied first. It is during this process that Hansa block access to all waterways of the body ensuring the faucet is Nickel free

### TYPE OF BRASS

Hansa use MS63DR Brass. This is premium brass due to low lead content. 63% Copper / 36% Zinc – <0.8% Lead in Basin and <0.3% Lead in Kitchen Faucets

## RODRIGO TORRES

Born in Bogotá, Colombia in 1976, Rodrigo Torres obtained his Bachelor's degree in Industrial Design from the Jorge Tadeo Lozano University in Bogotá and later his Master's degree in Design from Domus Academy of Milan. Rodrigo Torres has worked for major international companies such as Alessi, Nike and Poliform. Over the years, he has participated in several international exhibitions and has been rewarded with prestigious design awards. His work has been published in some of the most important design publications in the world.

"In times where careful use of water, our most valuable natural resource, should have the highest priority, objects such as ALESSI Sense by HANSA represent an exemplary development." – Rodrigo Torres

# ALESSI SENSE

ALESSI Sense by HANSA comprises high-quality faucets for washbasins. Their inventive creator – the renowned designer Rodrigo Torres – has produced a product family that represents a perfect blend of form and function. Motivating people to become more conscious of how they use water was the main focus of the development and design. It functions on the basis of an intelligent electronic operating system that encourages the user to engage.

## **ELECTRONIC BASIN TAP**

**Battery Operated**

HS0773 2201

Conserving resources means more than just switching off the light when you leave the room: ALESSI Sense by HANSA allows for intuitive and controlled use of water. There is a semi-transparent dish at the top of the fitting that you operate like a button. The flow of water is activated by pressing it briefly or for longer. An LED bar that functions like a timer 'runs out' accordingly. The flow of water can be stopped at any time by pressing the dish again. This gives you a sense of how long the water actually flows and you learn how to use it more consciously.

In 2016, Alessi Sense by HANSA washbasin faucets 07732201 and 07742201 were awarded with the Red Dot Award: Product Design.
