HANSA supplies the best quality in the market: A commitment that they have set themselves and is the standard on which customers base their evaluation. They meet this standard with both passion and purpose: providing products whose design, material, finish and technology continue to set new benchmarks.

 DESIGNED AND ENGINEERED IN GERMANY

Voted trade's No. 1 Brand in
Germany for the last 42 years

CARTRIDGE

Hansa tapware have an open flow cartridge where flow rates are controlled by an elliptical o-ring and honeycomb aerator which maintains a 3bar flow rate if pressure is increased higher.

COMFORT & SAFETY

Hansa Cartridges allow 120° of freedom. This provides the user greater anti scald protection with young children who tend not to be so careful when moving from cold to hot

CHROME

CHROMING

Hansa has perfected the balance between Nickel (12 Micron) and Chromium (0.3 Micron) to ensure its premium, non tarnishing finish

NICKEL FREE

For the Chromium to adhere to the brass nickel must be applied first. It is during this process that Hansa block access to all waterways of the body ensuring the faucet is Nickel free

TYPE OF BRASS

Hansa use MS63DR Brass. This is premium brass due to low lead content. 63% Copper / 36% Zinc – <0.8% Lead in Basin and <0.3% Lead in Kitchen Faucets

HIGH TECH FUNCTIONAL CORE

Hansa are using plastics with DVGW Certifications, conforming to KTW Standards and tested in accordance with W270, maintaining drinking water quality as it flows through the faucet

LIGNA

With its clear, unmistakable design and intelligent functionality, the HANSALIGNA series achieves a perfect union of sophisticated design and contemporary technology. The rounded edge conveys lightness and harmony, animated by the contrast between gently flowing inner forms and clear-cut geometries on the outside.
