

 **HANSA**

Vantis

**franklins**  
european bathrooms

HANSA supplies the best quality in the market: A commitment that they have set themselves and is the standard on which customers base their evaluation. They meet this standard with both passion and purpose: providing products whose design, material, finish and technology continue to set new benchmarks.

DESIGNED AND ENGINEERED IN GERMANY

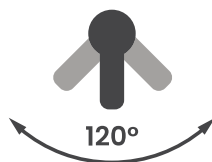

### **CARTRIDGE**

Hansa tapware have an open flow cartridge where flow rates are controlled by an elliptical o-ring and honeycomb aerator which maintains a 3bar flow rate if pressure is increased higher.

### **COMFORT & SAFETY**

Hansa Cartridges allow 120° of freedom. This provides the user greater anti scald protection with young children who tend not to be so careful when moving from cold to hot

### **CHROMING**

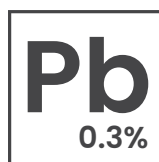

Hansa has perfected the balance between Nickel (12 Micron) and Chromium (0.3 Micron) to ensure its premium, non tarnishing finish

#### NICKEL FREE

For the Chromium to adhere to the brass nickel must be applied first. It is during this process that Hansa block access to all waterways of the body ensuring the faucet is Nickel free

#### TYPE OF BRASS

Hansa use MS63DR Brass. This is premium brass due to low lead content. 63% Copper / 36% Zinc – <0.8% Lead in Basin and <0.3% Lead in Kitchen Faucets

#### HIGH TECH FUNTIONAL CORE

Hansa are using plastics with DVGW Certifications, conforming to KTW Standards and tested in accordance with W270, maintaining drinking water quality as it flows through the faucet

# VANTIS

Typical of the HANSAVANTIS is the forward-leaning spout that gives the faucet a specially dynamic look. In daily use, the convenient operating concept proves that there is more to it than just attractive looks.
